**DEPARTMENT OF BIOTECHNOLOGY**

**Action Taken Report on feedback obtained in AY 2020-21**

**(M.Tech Biotechnology)**

19-04-2021

Stakeholder	Comments/Suggestions	Action taken or suggested
Student	Need more laboratory hours requirements	In R20 curriculum theory courses are integrated with laboratory courses, for more laboratory hours more theory courses need to be integrated with laboratory courses. Hence in the next curriculum revision more courses will be integrated with laboratory courses.
	Introduce advance computer courses	In the next curriculum revision advanced courses on data analysis will be introduced.
Faculty	R20 curriculum is good and completely research and industry oriented. Better to give more importance to digital learning courses in wide areas through NPTEL, coursera and swayam etc.	In M.Tech R20 curriculum two MOOCs courses were introduced to encourage students towards digital learning. In the next revision more credits will be allocated.
	More lab work can be included according to the student interest like Plant biotechnology, Animal biotechnology	In R20 curriculum theory courses are integrated with laboratory courses, for more laboratory hours more theory courses need to be integrated with laboratory courses. In the next curriculum revision department elective courses will also be integrated with laboratories.
Alumni	R 20 curriculum is fine, include more courses in elective streams	In the next curriculum revision, more number of courses under department electives will be offered

	Add more courses on informatics in elective streams	In the next curriculum revision, courses on informatics and computational biology under department electives will be offered
Employer	I appreciate efforts of VFSTR Department of Biotechnology for bringing R20 curriculum with good features. I feel informatics components are not sufficient	In the next curriculum revision, courses on informatics and computational biology under department electives will be offered
