

Taking the first step towards building the UAS Ecosystem:

Terra Drone India and VFSTR

Terra Drone India, associate company of Terra Drone Corporation (Headquartered at Tokyo, Japan), conducted a knowledge transfer symposium here on Friday at the campus of VFSTR. The program was honored by the presence of Dr. M. Y. S. Prasad, Vice Chancellor of the esteemed institute, Dr. M. S. Raghunathan, Registrar, Mr. T. Pitchaiah, HoD - ECE, and Dr. N. Usha Rani, Professor, ECE at VFSTR. A team of twelve members from Terra Drone India conducted the symposium, headed by CEO Mr. Prateek Srivastava, technology evangelist and distinguished businessman and COO Wing Commander Polu Sreedhar, serial entrepreneur and UAS visionary.

The agenda of the symposium was to establish the concept of Pratham Andhra and to focus on the unmatched capabilities of the Unmanned Aerial System today. The idea was to show how UAV today could aid in realization of Hon. CM of Andhra Pradesh Sri Chandrababu Naidu's Sunrise Andhra Pradesh Vision 2029. Geospatial Intelligence in Urban Administration and Real - Time Remote Sensing were among the other interesting topics that were a part of the schedule. An open house discussion was conducted to answer questions from the attending faculty members and research students. The symposium was concluded on an exciting note wherein Terra Drone India UAV flight team conducted a drone demonstration for all the attendees on campus grounds. This could count as a first step towards a meaningful association between Terra Drone India and Vignan's Foundation as the latter has proactively proposed the foundation of an Centre for Excellence for Unmanned Aerial Ecosystem in the institute.
