VISION

To evolve into a centre of excellence in Science & Technology
Through creative and innovative practices in teaching – learning,
towards promoting academic achievement & research excellence
to produce internationally accepted, competitive and
world class professionals
Who are psychologically strong and emotionally balanced
imbued with social consciousness and ethical values

MISSION

To provide high quality academic programmes,
training activities, research facilities and opportunities
supported by continuous industry – institute interaction
aimed at
Promoting employability, entrepreneurship,
leadership and research aptitude among students and
contribute to the economic and technological development
of the region, state and nation

Manual of Examination Automation System

Introduction: Examination procedures play a very vital role in any academic institution. They help the teachers and students in the Teaching Learning process by providing the necessary feedback during continuous evaluation. The results given by the examination systems are the benchmarks for the industries or the institutes for gauging the effectiveness of the academic institution. Properly organized and credible examination systems are essential for any good institution.

Automation of examination procedures is very much essential for ensuring the correctness of data, reducing the response time for activities like announcement of results, to ensure confidentiality and reduction of discrepancies. This manual describes the key modules of examination automation system in operation at VFSTR. The purpose of each individual module is discussed in brief and sample screen shots of user interface and outputs are provided for clarity.

Examination activities where automation was done:

- a) Student registrations for class work and subject allocation to student
- b) Examination time tables
- c) Continuous evaluation marks entry
- d) Invigilators assignment
- e) Examination seating plans, student signature sheets, absent statements etc...
- f) Registration of subjects for examination, hall ticket generation, room wise photo identification sheets, seating planes, absent statements
- g) Question paper setter database, selection of paper setters, remunerations, question paper databases
- h) Encoding and jumbling of answer scripts
- i) Valuators database, selection of valuators, marks entry, remunerations
- j) Results, retotalling, revaluation
- k) Certificates printing

- 2) Academic registration module :** Student will register for the subjects by using this module. Reports about the eligible candidates for enrollment, details of students who paid the tuition fee, not registered students will be taken out from this module for the use of administration.

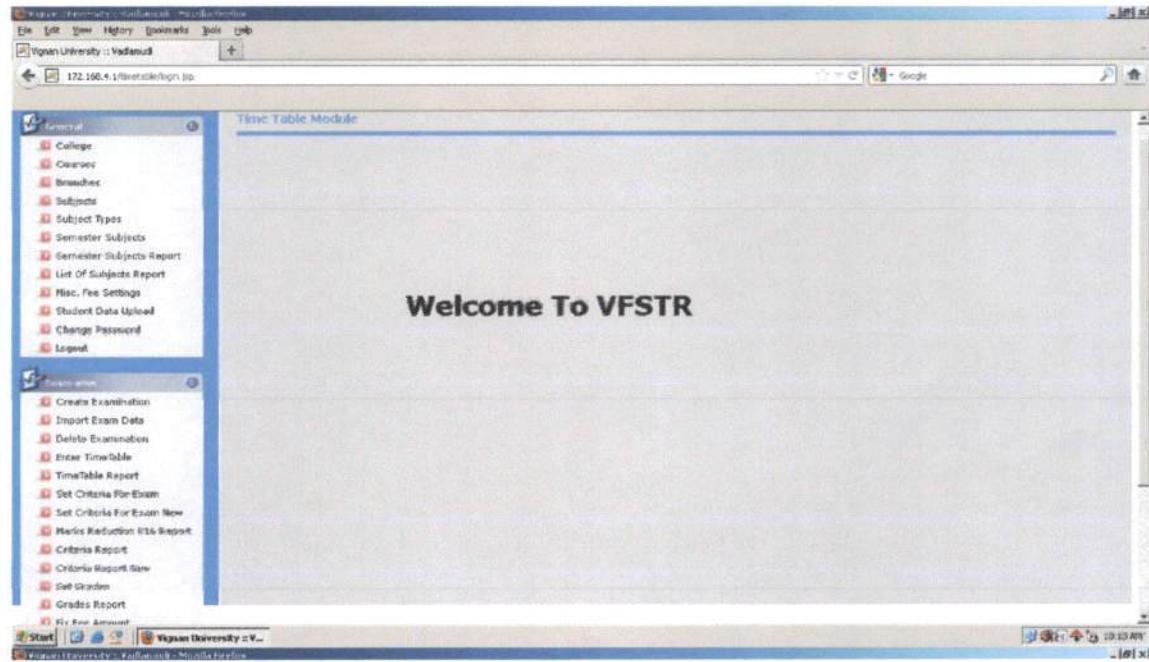

- 3) Continuous evaluation monitoring:** Entry of continuous evaluation schedules like mid examinations will be done through this module. Specifying the invigilation requirements, receiving invigilator data from departments, marking the absentees for the examinations, taking various reports of the examinations like absentees students, award lists are also done through this module. After posting of continuous evaluation marks by the faculty, various reports like exam wise, section wise marks, student wise marks reports will be taken for informing to HoDs. These marks will be sent to students as SMS.

Controller of Examinations
VFSTR
 (Deemed to be UNIVERSITY)

- 4) **Semester end examination time tables:** Once the draft copy of the examination time tables are ready then the details will be entered into the software. Details like pass criteria, grading system and credits allotment will be also entered into package along with examination dates. Provision to take necessary reports is also incorporated.

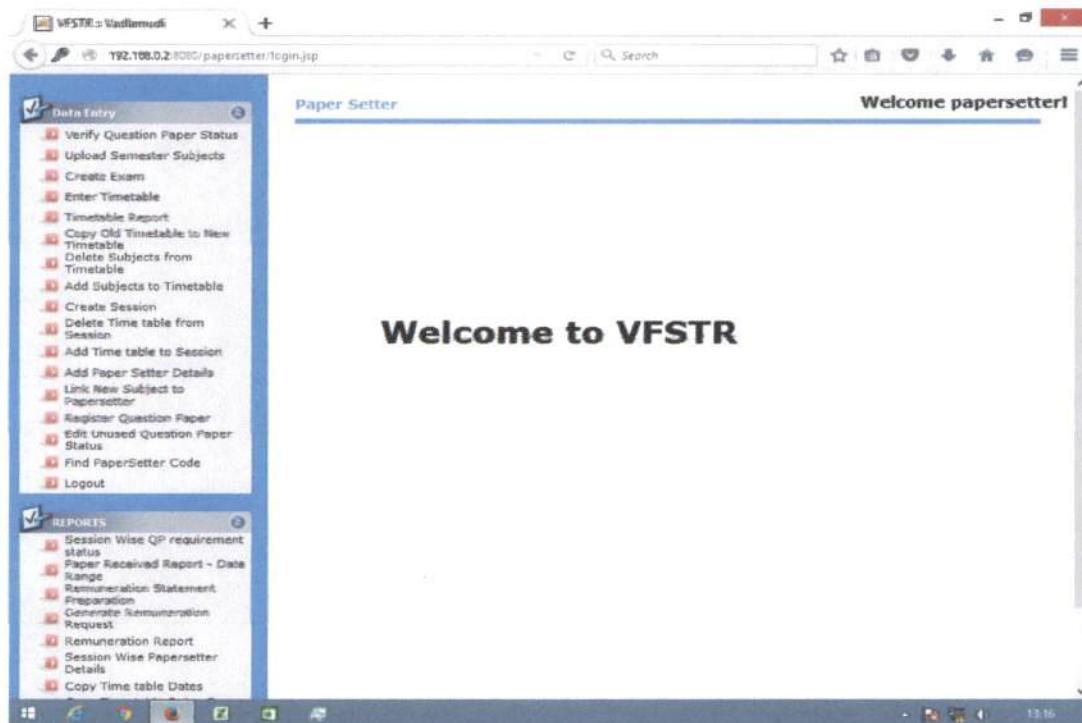

- 5) **Examination fee collection:** This module provides the facility to collect examination fee from students and registration for the subjects, generation of attendance statements after examination, reports giving details of students writing examination on any given day etc... will be taken through this module

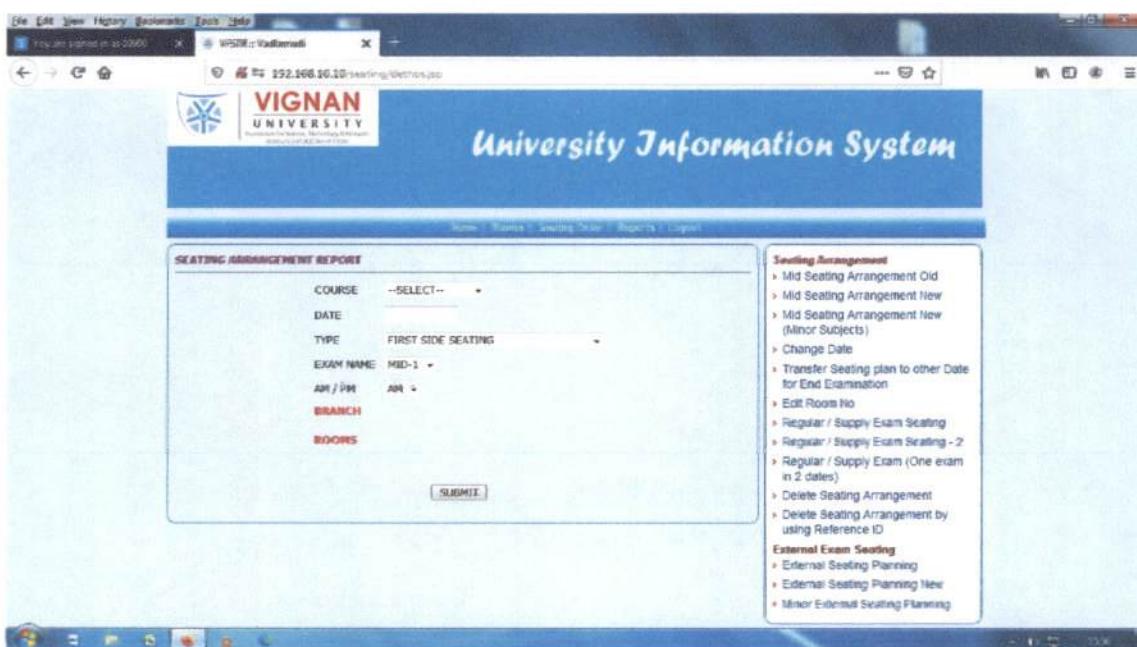

Manual of
Examination Automation System

Controller of Examinations
VFSTR
(Deemed to be UNIVERSITY)

- 6) **Question paper module:** Maintains paper setter database, details of papers used and unused, question paper requirements, remuneration bills. It also provides various reports of sorted data for paper setter identification.

- 7) **Examination seating module:** Provides room wise examination seating arrangements, photo verification sheets, student signature forms, question paper requirement room wise, consolidated question paper requirement, seating arrangements to be displayed at notice boards, hall ticket issue, duplicate hall tickets etc.,

Assistant Controller of Examinations

- 8) **Encoding :** Randomly generated 6 digit number will be assigned for each answer script to replace the registered number on the student answer script to ensure unbiased evaluation by examiner. This module facilitates the process. It also jumbles the answer scripts, form bundles as per given inputs and provides various formats needed for evaluation. The details of examination registrations and the absentees details are inputs into the module.

Examination Automation System

Summary: All the staff members working at examination section are extensively trained on these procedures and detailed work instructions to operate each activity are provided as operational procedures. Activity based individual logins are provided to ensure security.

Effective implementation of automation practices and their applications has helped in reduction of grievances and time to issue the examination results and related reports. These practices helped a lot in improving the security of examination related data.
