Webinar Report On Applications of Deep Learning

**Organized by
Department of Computer Science & Engineering
VFSTR Deemed to-be University, Vadlamudi
06 – 08 -2021**

Title: One Day International Online Webinar on Applications of Deep Learning

Date:6-8-2021.

Webinar Speaker: Dr. V. Masilamani, Associate Professor and HOD in Computer Science and Engineering, Indian Institute of Information Technology, Design and Manufacturing, Kancheepuram (IIITDM Kancheepuram), Chennai 127

Total Registrations:384

Number of participants:250

Description of the Program:

Vignan's Foundation for Science Technology and Research is NAAC 'A' grade institution and secured good rank in engineering category by the National Institutional Ranking Framework (NIRF). The Department of CSE along with the Department of IT, has planned to organize a series of webinars on emerging technologies for faculty and research scholars to improve the research potentiality and to get updated with emerging trends in the industry. As the part of series of webinars, The Department of Computer Science & Engineering has organized a webinar on "Applications of Deep Learning". This webinar has received an overwhelming response. 384 Faculty members, research scholars, students from various Higher education institutions and Universities have registered and 250 participants attended the webinar. There were 12 international participants also.

P. Jhansi Lakshmi, Program organizer, welcomed all the delegates and participants to the webinar. Mr. D. Yakobu, introduced the webinar speaker Dr. V. Masilamani, Associate Professor and HOD in Computer Science and Engineering, IIITDM Kancheepuram. Initial remarks were given by Dr. Venkatesulu Dondeti, Head of the Department, Computer Science & Engineering. He quoted the need, usage and deployment of applications in Cloud infrastructure and the migration of industries towards cloud.

Dr. V. Masilamani, gave insights on “Applications of Deep Learning”. In this webinar, Dr. V. Masilamani, discussed about Motivation of CNN, Applications of Deep Learning, CNN, Feed forward neural networks, Different well known Architecture

Later, there was a queries session where the participants posed queries regarding the ways this technology can mastered and also usage of this approach in their projects, for which answers were delivered. This was followed by geo-tagged photo session.

Finally, vote of thanks was given by Mr. D.S. Bhupal Naik, he thanked every participant for their active participation during entire session. He also appreciated program coordinators Dr.M Nirupama Bhat, Dr U Sri Lakshmi, Mrs. P.Jhansi Lakshmi, Mr. D. Yakobu, and CSI coordinator Dr. S.K.Satpathy for organizing the webinar in a successful manner. He expressed the gratitude to the Webinar Speaker Dr. V. Masilamani, for sharing the importance of Deep Learning with all participants, amidst his busy schedule. Also, he expressed his sincere thanks to Dr. L. Rathaiah, Chairman, Vignan’s group of Institutions, Management, VFSTR and the cooperation from the department for organizing this webinar.

At the end the session the feedback of the participants were taken. It was very positive and motivational for the organizers. They said that the program was very useful and helpful for them in their knowing the emerging trend and helpful for the students in their project and applications development. All the participants appreciated the sessions and the arrangements made by the organizers.

Abstract: Cloud native approach to build and run applications exploiting the advantages of the cloud computing delivery model. This approach helps the companies to respond in a faster manner to the customer's demands with new ideas. They are designed to deliver well-recognized business value, like the ability to rapidly incorporate user feedback for continuous improvement.

This webinar covers the importance of the emerging trend of enterprise cloud native applications, the key component in building a cloud Native Application and the reasons for the software companies moving towards this trend. The skills, knowledge, beliefs, rules (laws), customs and habits of cloud-native development team are also discussed.
