

## **Workshop on Scientific Writing using LaTeX**

In view of continuous learning and research activities, the Department of Electronics & Communication Engineering, VFSTR, Vadlamudiwas organized a workshop on "**Scientific Writing using LATEX**" on July 22 & 23, 2021 by Dr. Sharad Kumar Tiwari.

LaTeX, which is pronounced «*Lah – tech*» is a document preparation system for high-quality typesetting. It is most often used for medium to-large technical or scientific documents but it can be used for almost any form of publishing. LaTeX encourages authors not to worry too much about the appearance of their documents but to concentrate on getting the right content. To produce a document in regular word processing systems, the author would have to decide the layout, font-size, font-type etc, which would be time consuming and the result would be badly designed documents. Whereas in LaTeX the author would leave the designing to document designers, and concentrate on the content of the document.

The Main aim of the workshop was to make the participants understand about LaTeX system, explain procedure of LaTeX typesetting, familiarize the participants with various document formats. The program included the practical sessions on Resume, Report, Paper, Presentation, and Thesis Writing to the participants with emerging software tools, all major concepts of LaTeX typesetting were covered during the training program required for teachers/research scholars for their research work. His talk was very exploratory and various different departmental faculty and research scholars participated in this offline event.
